Qualifications and Instructions

If you are a self-employed individual and were not able to deduct all of your health care premiums from your federal adjusted gross income, you may be eligible for a tax credit equal to the portion of your federal tax liability incurred due to the inclusion of your health care premiums in your federal adjusted gross income. The self-employed health insurance tax credit is refundable.

Calculate your tax credit by using either method below and enter the total on the Miscellaneous Income Tax Credits (**Form MO-TC**). Self-employed individuals with personal exemptions and itemized deductions limited on their federal return because their federal adjusted gross income exceeded the limits established by the Internal Revenue Service should use the Regular Method. If you are filing a combined return, and both spouses were self-employed and paid health insurance premiums, combine the amounts paid by both spouses when calculating your credit.
