## Instructions to the Applicant

In lieu of related taxes, owners of motor vehicles which operate with LP-propane or electricity must annually purchase a special fuel decal prior to January 31 and pay the annual decal fee based on the way the vehicle is licensed. Owners of plug-in hybrid electric vehicles (PHEV), model year 2018 and newer, will pay one-half the annual fee of an alternative fuel decal. Natural gas vehicle owners or operators who have not installed their own natural gas fueling station are exempt from the special fuel decal requirements. Special fuel requirements do not apply to motor vehicles with historic registration or vehicles powered by gasoline and electric that are not identified as a plug-in hybrid electric vehicle. The special fuel decal shall not apply to an owner or operator of any vehicle powered by propane who fuels such vehicle exclusively at unattended fueling stations that collect the motor fuel tax.

**Fee includes the applicable processing fee for each transaction.**

For motor vehicles which are not in operation by January 31 of any year, the decal fee shall be reduced by one-twelfth for each month which has elapsed since the beginning of the year. The owner of any vehicle that was titled, registered and equipped to use LP-propane, natural gas or electric fuel as of January 15 must pay the full year's fee.

When an applicant increases the licensed gross weight of a commercial motor vehicle, the applicant may be required to complete the weight change section of the application and pay additional decal fees if the weight increase requires an increase in the decal fee.

When the ownership of a motor vehicle which is fueled by natural gas is transferred to another person, the decal issued to the motor vehicle will remain with the vehicle. If the new owner has installed a compressed natural gas or liquefied natural gas fueling station, the new owner must complete a new application for the fuel decal but no fee will be charged for the decal transfer. If the new owner of a vehicle fueled by natural gas has not installed a compressed natural gas or liquefied natural gas fueling station, no action is required of the new owner. When the LP-propane, natural gas, or electric fuel equipment is removed by the owner upon sale of the vehicle and installed on another vehicle owned or purchased by the same individual, the special fuel decal can be transferred to the newly gas-equipped vehicle.

A replacement decal may be purchased for a \$8.50 fee and a \$9.00 processing fee.

The decal must be displayed in the lower right-hand corner of the windshield on the vehicle for which it was issued.

Note: License Office notary service - \$2.00

## Completion of the Application

1. Applicant must complete all the information requested in the application. Failure to complete the application in full will delay processing.
2. If the applicant is transferring ownership of the decal, the previous owner information must be completed in full.
3. When requesting a replacement decal, all information requested concerning the applicant and the vehicle must be completed in addition to the information concerning the replacement decal. The application must be notarized when applying for a replacement decal.
4. Applicant must present proof of ownership for the motor vehicle in the form of the previous year's registration receipt.
