Plan Description:

The Northgate Redevelopment involved the replacement of single-story garden style apartments 666 with a mixed-use redevelopment. The last years of the complex saw an increasing amount of unattended deterioration which became an increasing blight upon the community and surrounding neighborhoods. Given it made up such a significant portion of the city's residential community, the City decided to take the significant step of designating the area for redevelopment. The City solicited proposals in 1999, selecting the development team of Hunt Midwest, Inc., in partnership with The Rainen Companies. The development agreement approved in tandem with the TIF plan states that the City is responsible for acquiring the property, relocating residents of the apartments, demolishing the old apartment complex, and installing the infrastructure. The City would then sell the land to each respective developer, with no additional funds required of the City. The City would receive any TIF proceeds as reimbursement of the pre-development costs developers do not receive any TIF proceeds. As of December of 2009, the City has activated all 15 designated TIF project areas that make up the redevelopment project. Commercial Ruby Tuesday is the only commercial business within the redevelopment project. The City will continue to search for partners to develop the remaining commercial lots. Residential All four phases of The Gardens senior living apartments 318 have been completed. The first phase of the City View apartments 246 units were constructed in 2006. The City anticipates construction on the final parcel designated for apartments to begin in 2019. All single-family 95 and patio homes 29 in the Northgate Village redevelopment project have been completed. Currently 64 rowhomes have been sold with the remaining 30 rowhomes to be constructed in the next two years.

Plan/Project Status: Under Construction

Area Type: Conservation

But for Determination:
Project had unusual/extraordinary costs that made the project financially unfeasible in the market place.
Project required significant public infrastructure investment to remedy existing inadequate conditions.
Project required significant public infrastructure investment to construct adequate capacity to support the project.
Project required parcel assembly and/or relocation costs.
